

Croydon Solar Farm

Community Benefits Workshop

Help shape how Croydon Solar Farm delivers lasting benefits for the local community.

ACEnergy is inviting local residents and stakeholders to help identify community priorities that will inform the Community Benefit Agreement (CBA) being developed with Isaac Regional Council. A Community Benefit Agreement outlines how the project will contribute through community investment and other benefits.

What we'll discuss:

- Hear the latest Project update
- Share what's important to you and your community
- Explore ideas for community benefits and local investment opportunities
- Help identify community priorities for consideration in the Community Benefit Agreement
